## The Skylight Alternative

Simulating the outside, inside your home

PATENTED  
TECHNOLOGY

AMBIENT LIGHT  
TECHNOLOGY

Available in a range of shapes and sizes

The illume Skylight Alternative has a sleek design, using solar technology to transform any room into a bright space by simulating the lighting conditions outside, without the need for a light shaft.

Install an illume, instead of a traditional skylight, to bring more light into your home. Perfect for walk-in robes, enclosed hallways, kitchens, pantries and even your bathroom.

Unlike a traditional skylight you can even install an illume to lower levels, basements and attics – the possibilities are endless! illume's innovative design cuts the cost of your electricity, with no running costs or batteries.

Installation is easy and non intrusive. Unlike traditional skylights, there is no light shaft, and penetration is not required.

No bugs

No leaks

No heat transfer

No light shaft

- No light shaft or UV
- No mains power or batteries required
- No running costs
- Easy to install
- Hail resistant
- 2 year warranty (upon registration)

## How does illume work?

### Solar Panel

illume is powered by a solar panel positioned on the roof, cutting the cost of your power bill, by reducing the need for electrical lighting or batteries in your homes dark rooms or spaces.

### illume Skylight Alternative

### Transfer Cable

The solar power is transferred to the light panel via a cable, simulating the lighting conditions outside. illume automatically comes to life at sunrise, and its intensity varies during the day depending on sun exposure and cloud cover outside.

### illume Light Panel

The lighting panel uses **Ambient Light Technology (A.L.T)**, bringing light into the dark areas of your home, creating the feeling of harmony between external and internal lighting conditions.

## Accessories and Options

### illume Remote Dimmer

- Turn your illume on/off remotely
- Automatically resets overnight

Suits all illume sizes except 600x1200mm

### Multi System

- Up to 9 illume light panels can be connected to 1 solar panel
- Perfect for multi storey buildings

### Interior Window

- Solution to a common construction limitation
- Perfect for boundary walls
